

# Christmas Song Bird

1. Copy the image on to card to make a template and cut out using scissors or a craft knife.
2. Using double sided heavyweight paper or light card of your choice draw round the template with pencil.
3. If using plain white card the bird can now be decorated with paints, crayons or sequins. Remember you only need to decorate one side of the body and head parts as...
4. ...you now spread glue lightly over the inside of the head and body, fold along the bottom of the body and press together, trapping a short length of ribbon or thread in between as hanger.
5. Make the eye using a hole punch, fold down the wings and open out the tail feathers.
6. Hang on tree, stand back, admire then make several more!
